The Hospitality Industries proven Choice for Clean & Healthy Rooms

Housekeeping chores are a never ending problem for hotel, motel and guest cottage management. **HDC®** helps solve many of chores while reducing time and complaints from guests. Nothing is as offensive when you are on vacation as a dirty bathroom or a smelly room.

HDC® is the answer to a clean, fresh smelling room.

HDC® can be sprayed on shower walls and on tubs to remove soap scum, mold and mildew. Soap film hardens over time until it must usually be scraped away. **HDC®** penetrates even old soap deposits and allows it to be brushed away with a scrub pad or nylon brush. Follow with a clean water rinse for shiny clean tubs and showers. After initial cleaning it is normal to spot clean on a weekly schedule. Most users report that when **HDC®** is kept on their maid's carts the routine spray and wipe keeps "deep cleaning" to a minimum.

HDC® removes mold and mildew as the soap film is removed. Grout joints may initially need to be sprayed, then allowed to penetrate for a *minute or two* followed with a soft brush to remove stains. After initial cleaning a weekly spraying with **HDC®** retards mold and mildew growth to a minimum.

Smoking rooms are quickly deodorized with **HDC®** routine cleaning. Bathrooms in smoking rooms are extremely hard to clean because of the concentration of nicotine residue that builds up on fixtures and walls. A spray & wipe with **HDC®** solves the odor problem as well as removing the yellow film that always is present in smoking areas.

One (1) ounce of **HDC®** added to a quart of your favorite window cleaning solution will keep fogging to a minimum.

Pet odors and human waste associated odors are quickly neutralized with **HDC®**. These stains quickly penetrate carpets and upholstery and must be removed as soon as possible.

HDC® eliminates the need to call a cleaning company for most carpet and upholstery chores including removal of grit & grime in high traffic areas and stains on lobby furniture.

HDC® removes most oils, ink stains, food stains and even blood stains.

HDC® is safe for use on all commercial fabrics and finishes.

HDC® is effect as a pre-wash spotter for linens that are stained with blood, makeup and mascara.

Room A/C unit coils should be sprayed with **HDC®** to keep units clean and functioning at maximum effecientcy. Spray the coil then flush with a hose. **HDC®** is not harmful to the environment and does not have a harsh odor like most coil cleaners. **HDC®** will not harm flowers or shrubbery if spilled.
