

SHEEN MAGIC® Hydrocarbon Sheen Remover

Designed for Those Critical Times on the Water When Every Single Minute Counts!

**US EPA-LISTED**

THE ADVANTAGES

SHEEN MAGIC® is the easiest way to eliminate problems associated with hydrocarbon clean-up applications on the water without further harming the environment.

SHEEN MAGIC® is a new chemical formulation, which restores streams and lakes to pre-contamination quality. The formulation removes sheens normally associated with hydrocarbon spills.

Unlike most products or procedures currently available to the remediation industry, SHEEN MAGIC® is 0-0-0 Hazmat Rated, based on US-EPA LD50 and California Code 65 Guidelines.

SHEEN MAGIC® actually destroys the hydrocarbon-induced problem by breaking the hydrocarbon chain. The contaminant neutralized is either molecularly modified into a benign stearate or it is decomposed into a non-toxic, non-hazardous, microbe nutrient that is consumed by naturally occurring microbes in the water.

SHEEN MAGIC® is the tested non-hazardous solution for problems resulting from hydrocarbon contamination of waterways. SM is US-EPA LD50 and California Code 65 safe. The beauty of SM is the ease of application.

Hydrocarbon is the fuel, gas, oil or grease that enters the waterways as a result of fuel spills, leaks or drips, industrial practices or mishaps, or highway, railway wrecks, or waterway shipping accidents.

Fueling mishaps at marina fuel docks are one of the major causes of sheens on inland bodies of water. Almost every time a pleasure craft is fueled, either at a marina, public ramp or home dock, a spill occurs.

These spills may account for only a few drops of gasoline or a gallon or more. One cup of fuel can cause a spill that covers many acres of water surface. All spills, by law, must be reported to the proper authority. Immediate control of the spills can save immeasurable damage to the environment as well as fines and levies for the person responsible for the spill.

Treatment with SHEEN MAGIC® is the best way to remove or reduce the hydrocarbon contamination of the water surface. SHEEN MAGIC® reduces the hydrocarbon concentration faster than any other product or treatment method. This reduction in hydrocarbon concentration is accomplished by the action of SHEEN MAGIC® breaking down the hydrocarbon into smaller compounds, which become nutrients, or food, for naturally occurring bacteria in the water. The bacterial action removes all hydrocarbons, which results in clean, uncontaminated water.

Treatment with SHEEN MAGIC® is fast and easy. Small spills should be sprayed with a low-pressure mist of SHEEN MAGIC®. The mist will immediately react with the hydrocarbons as described above to destroy the hydrocarbon chain. The clean up can be seen immediately. Occasionally a layer will remain after SHEEN MAGIC® treatment. This is not a hydrocarbon contamination, but rather a floating emulsion of polymers from certain 2-cycle engine oils.

Illegal detergent treatment of spills will emulsify all the hydrocarbons, which then sink to the bottom. These heavy hydrocarbon emulsions are dangerous to aquatic life and should be avoided at all costs. Detergent treatments may result in fines of \$5000 to \$25000.

Large volume spills are treated in the same manner as small spills, but a high volume, low-pressure delivery system should be employed until all evidence of the sheen is removed.

SHEEN MAGIC® is packaged in convenient applicator spray bottles for home and marina use, as well as bulk volumes for professional environmental remediation.

The end result of SHEEN MAGIC® treatment of hydrocarbon spills is reduced remediation time and costs, reduced assessments or fines, and a cleaner environment.

- ◆ Meets or exceeds US EPA Testing Guidelines for approval for and acceptance to the NCP Product Schedule
- ◆ Breaks up hydrocarbon compounds, converting them into nutrients for naturally occurring microorganisms
- ◆ 0-0-0 Hazmat Rated
- ◆ Quickly and effectively treats estuary hydrocarbon sheen contamination
- ◆ Remediation time is minimal
- ◆ Results in a greater savings of labor and reduced hazardous materials training involved with general maintenance operations
- ◆ PPE recommended, but not required for application or storage
- ◆ There is no cleanup of "spent" minerals or compounds to remove or discharge
- ◆ Contains no "bugs", nitrates, nitrites, phosphates, acids, detergents or harmful compounds

DISCLAIMER: SHEEN MAGIC® Oil & Gas Sheen Remover is on the U.S. Environmental Protection Agency's NCP Product Schedule. This listing does NOT mean that EPA approves, recommends, licenses, certifies, or authorizes the use of SHEEN MAGIC® Oil & Gas Sheen Remover on an oil discharge. This listing means only that data have been submitted to EPA as required by subpart J of the National Contingency Plan, Sec. 300.915.
